Overview

Applied microbiology is a branch deals with application of microorganisms in the field of science for the production of human beneficial products such as medicines, antibiotics, vaccines, enzymes, biotechnological engineered products and also in food technology as fermentation products.

ICAM 2023 brings experts in the field of microbiology from all over the globe to share and showcase their research results. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. This will be the best chance to interact and share your research with experts from all parts of the world.

Opportunities

We are excited to invite you to sponsor and exhibit at the ICAM 2023. Download the 2023 Exhibitor and Sponsorship Prospectus.

Call for Papers

Participants are invited to submit abstracts on research and findings relevant to the scientific sessions. The sample template is available in the "Abstract submission" page of the conference website. Accepted abstracts will appear in the conference extended abstract book, which will be available, on-line and distributed at the event.
